Art Unit: 1775

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Xu et al (5,973,444) or Nolan et al (5,780,1010 or Moy et al (5,726116) or Tennent et al (5,165,909) or Rodriguez et al ("Catalytic... Nanostructures").

The above references appear to produce the claimed assembly having a fibrous body with graphite filaments there between.

3. Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by Penn State (WO 01/98208).

The above reference appears to produce the claimed assembly having a fibrous body with graphite filaments there between.

4. Applicant's arguments with respect to claims 1-2 have been considered but are moot in view of the new ground(s) of rejection.
